

38TH KERALA SCIENCE CONGRESS

30 Jan - 02 Feb 2026
St. Albert's College (Autonomous)
Ernakulam, Kerala

natpac

The National Science Exhibition

The Kerala Science Congress, one of KSCSTE's flagship programmes, is an annual celebration of science and innovation that brings together scientists, researchers, academicians, entrepreneurs, and young minds to exchange ideas, discoveries, and experiences.

The National Science Exhibition 2026 is a significant event—the largest of its kind in South India—showcasing research, education, culture, innovation, and entertainment, organised as part of the 38th Kerala Science Congress in an airconditioned hanger in the serene ambience of St. Albert's College, Ernakulam. Inspired by visionary leaders, pioneering scientists, groundbreaking innovations, and outstanding infrastructure, this expo offers a dynamic platform that merges education and advancement with Kerala's rich cultural heritage.

Sparking Futurism

As we approach a new era focused on the pursuit of scientific excellence, the National Science Exhibition, organized as part of the 38th Kerala Science Congress, represents the essence of scientific inquiry. It promotes transcending boundaries, thinking creatively with intention and developing societies that are prepared for the future.

Over four days, the expo will showcase KSC's history, feature pavilions on focal theme and include an Innovation Zone, a Young Innovator Zone, and a Networking Zone. A majority of the national and state institutions, NGOs, startups, industries, etc, are also participating. Attendees can also look forward to deep-dive sessions and thought-leadership dialogues that highlight the impact of science and technology across various sectors and societies.

Who all can participate?

- R&D Institutions
- Educational Institutions
- Innovators
- NGOs
- Start-ups
- Industries

South India's Premier Science Exhibition

The National Science Exhibition at the 38th Kerala Science Congress will focus on various conversions: converting ideas into ventures, conversations into partnerships, and product demos into deals.

Set against the conventional backdrop of events, this year's exhibition promises a transition phase, spotlighting innovation, collaboration, and commerce. With a significant leap in participation, floor area, and industrial representation, the exhibition is set to become the professional engines of the Kerala Science Congress.

Highlights

- 200+ Exhibitors showcasing R&D output
- Engaging Experiences and Live Product Demonstrations
- Focal theme Pavilion
- Innovation zone
- Startup Spotlight
- Partnership Opportunities
- Curated Networking
- Awards & Recognition

Opportunity for Startups

At the National Science Expo, entrepreneurs will have incredible opportunities to learn, network, and form partnerships that can elevate their startups to new heights. Excited entrepreneurs will have the unique chance to engage with industry leaders, investors, mentors, policymakers, media representatives, and fellow entrepreneurs.

The Startup Pavilion will be a major attraction, featuring over 100 startups, incubators, and accelerators from various sectors, providing an excellent opportunity to showcase your innovations to business visitors.

Focal Theme Zone

The focal theme of the 38th Kerala Science Congress is "Ocean Science for Blue Economy and Ecosystem Restoration." Research and development institutions, industries, innovators, policymakers, startups, NGOs, and others involved in this field are encouraged to participate by showcasing theme-focused exhibits.

Innovation Zone

The Innovation Zone is a dynamic platform showcasing cutting-edge research, innovative technologies, and novel solutions in science and technology. It's a space where established institutions converge to share ideas, collaborate, and inspire. Explore the latest breakthroughs, interact with innovators, and discover opportunities to shape the future.

Young Innovators Zone

Young Innovator's Zone is a vibrant platform showcasing groundbreaking ideas and inventions by young minds. It's a space where budding scientists and innovators share their projects, collaborate, and inspire others. Explore the next generation's solutions to real-world challenges.
